1. Qualitative Information on Financial Results for the Period under Review

(1) Explanation of Business Results

The Japanese economy during the nine months ended March 31, 2016 has been on a moderate recovery trend. However, cautiousness in future outlook increased and consumer confidence showed signs of weakening and has remained lacking in strength. Meanwhile, in the EC market, such as product sales and service, where the Company's business is built on, the B to C market has continued sustainable growth and the C to C market has also showed expansion partly due to the effect of the spread of smartphones.

Under these circumstances, in order to achieve the goals of operating income of ¥2.0 billion and ROE of 15%, which were stated at the launch of the "Medium Term Three-Year Management Plan (July 2013 - June 2016)" announced in August 2013, the Company has promoted and executed various policies in the final year of the Plan.

The core of our Medium Term Three-Year Management Plan is formed by two wheels: the establishment of a business scheme responsible for the next generation, and "*kaizen*" (expanding functions, stable system operation and cost performance improvement). In terms of establishing business schemes, in 2014, we launched an innovative direct sales model for buses, "Bus Mori! NAVI" (a smartphone route search application for consumers), a bus IT-enabled solution, and "Bus Mori! MONTA" (a real-time management service of express bus reservation status for bus companies), and we are entering the phase to validate the effect of these solutions. We are proceeding with research and development of applications for consumers as an essential part of WELLNET's future, and we plan to complete development this year. With the transition to paperless invoices, the shift towards electronic payment is expected to gain momentum. We will strive to expand business by introducing solutions that can accurately respond to the growing market for paperless processes.

As for "*kaizen*," we are aiming to improve cost performance through automating operations and promoting standardization. We are also promoting other *kaizen* measures for stable operation. For the nine months ended March 31, 2016, the B to C market has continued sustainable growth along with the expansion of the C to C market. In addition to the increased handling of existing contracted business operators, as also evidenced by the increased handling of examination fees in line with the growth of online applications for college entrance examinations, we have also actively promoted the cultivation of new business operators.

As a result, for the nine months ended March 31, 2016, the Company recorded net sales of ¥7,824 million (up 18.4% year-on-year), operating income of ¥1,699 million (up 22.4% year-on-year), ordinary income of ¥1,712 million (up 39.4% year-on-year), and net income of ¥1,152 million (up 43.6% year-on-year).

From this fiscal year, we will change our conventional disclosure grouped by type of service to "Payment and Accompanying Services." The reasons are as follows.

- 1) With payment as our core business, we are striving to expand its peripheral services. However, compensations are collected almost entirely as "payment commissions," making the distinction between "payment" and "peripheral" difficult, and as the distinction may vary depending on interpretation, it was determined that making disclosure by service is not appropriate.
- 2) After termination of our large-scale authentication service, the amount of our pure electronic authentication services decreased substantially, and as payments are always involved, we are virtually earning compensations as payment commissions.
- 3) As our Online Services Business originally makes use of our payment infrastructure with convenience stores, making distinction of assets difficult, it may be positioned as "Payment and Accompanying Services."

(2) Explanation of Financial Position

Total assets as of March 31, 2016 stood at ¥20,503 million. Current assets were ¥18,908 million. This mainly comprises cash and deposits of ¥11,926 million and securities of ¥4,999 million. Cash and deposits include ¥9,444 million of receiving agency deposit in money collection business, which is the money kept temporarily by the Company up to the predetermined date of transfer to operators in the following month. Non-current assets amounted to ¥1,595 million. This mainly comprises property, plant and equipment of ¥404 million, intangible assets of ¥463 million, and investments and other assets of ¥726 million.

Meanwhile, total liabilities amounted to ¥12,215 million. This mainly comprises receiving agency deposits of ¥9,444 million and operating accounts payable of ¥1,181 million. Total net assets amounted to ¥8,287 million. This mainly comprises shareholders' equity of ¥8,248 million.

(3) Explanation of Financial Results Forecast and Other Forward-looking Information

Financial results for the nine months ended March 31, 2016 mostly remained within the range of our forecast, and the financial results forecast for the fiscal year ending June 30, 2016 is unchanged.
